

RAISSA CRANE

Full-Stack Software Engineer

Port Orchard, WA · 206-225-8071 · raissaglaucie@icloud.com · [LinkedIn](#) · [GitHub](#)

PROFESSIONAL SUMMARY

Outcome-driven Full-Stack Software Engineer with production experience building Python/React systems that reduced healthcare intake costs by 35% and accelerated eligibility workflows by 25%. Skilled in full-stack web development, cloud infrastructure (AWS), containerization (Docker/Kubernetes), CI/CD pipelines, and Infrastructure as Code (Terraform). Ada Developers Academy and Code Platoon graduate. AWS Certified Cloud Practitioner. Trilingual: English, Portuguese, Spanish.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Django REST Framework (DRF), JavaScript, TypeScript, React.js, Redux Toolkit, Flask, PostgreSQL, HTML5, CSS3, Linux/Bash

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, ECS Fargate, ECR, ALB, VPC, IAM, SNS, SQS, CodeBuild, CodePipeline, CloudWatch), Terraform, Docker, Kubernetes (K8s/EKS), CI/CD, GitHub Actions, Jenkins

Tools & Practices: Git/GitHub, REST APIs, JWT, Test-Driven Development (TDD), Agile/Scrum, Jira, Confluence, Storybook, Postman, Vite

Certifications: AWS Certified Cloud Practitioner · LEAN Six Sigma Yellow Belt · RPA Automation Anywhere · IQ Bot · Java Foundations

TECHNICAL EXPERIENCE

Full-Stack Software Engineer Intern | [Cerebral](#)

Feb 2024 – Jul 2024

Remote, United States

- Built a Python CLI tool (RTE) integrating Candid's API to parse patient data from CSV and automate insurance eligibility checks — reducing processing costs by 35% and cutting manual intake time significantly.
- Developed a "Check Insurance Eligibility" React/TypeScript page with Storybook components, real-time API responses, and robust form validation — accelerating EMR/Coordinator workflows by 25%.
- Architected Flask/PostgreSQL backend microservices and designed an empty-state view for patients without primary insurance records, improving data retrieval efficiency and UX.
- Automated removal of deprecated patient flag associations using Ruby and RSpec, applying TDD methodology throughout the full project lifecycle.
- Collaborated asynchronously in a remote team of 9 using GitHub, Jira, and Confluence, maintaining strong documentation and cross-functional visibility.

Process Engineer Fellow | [USAA](#)

Jan 2025 – Apr 2025

Chesapeake, VA (Hiring Our Heroes)

- Led ROI analysis for annual RPA recertification across two lines of business, delivering data-backed insights that directly informed leadership decision-making.
- Spearheaded an inventory and review of 3,000+ internal wiki pages for the Bank Intelligence Automation (IA) team, streamlining knowledge management and documentation standards.
- Managed Access Management Requests, ensuring compliance with enterprise security standards and regulatory requirements.
- Recognized by program leadership for initiative, problem-solving, and cross-functional collaboration throughout the fellowship.

EDUCATION & TRAINING

Cloud Computing Certificate | [Ada Developers Academy](#)

May 2026 – Jul 2026

Remote

- Advanced cloud curriculum: AWS microservices on ECS Fargate, CI/CD with CodeBuild & CodePipeline, event-driven architecture with SNS/SQS, VPC networking, IAM, RDS, and DynamoDB.

DevOps & Cloud Engineering Certificate | [Code Platoon](#)

Nov 2024 – May 2025

Remote

- Provisioned cloud infrastructure with Terraform IaC; containerized apps with Docker and orchestrated deployments on Kubernetes (EKS).
- Built CI/CD pipelines with GitHub Actions and Jenkins, achieving zero-downtime deployments.

Full-Stack Software Engineering Certificate | [Ada Developers Academy](#) Feb 2023 – Jan 2024

Remote

- Completed a highly selective (10% acceptance) full-stack program; mastered Python, Flask, PostgreSQL, JavaScript, React, REST API design, OOP, Big O, and Agile SDLC.
- Designed and deployed a full-stack capstone (Nanny Kid Playdate) from concept to production using React + Django + AWS S3.

PROJECTS

Nanny Kid Playdate · Django · Django REST Framework · React · Chakra UI · PostgreSQL · Amazon S3

- Built a full-stack web app connecting nannies for playdates; developed user profile management with Django and React, integrating Amazon S3 for image storage.
- Implemented a community platform for posting and commenting on pictures and place recommendations using Django RESTful API and React.
- Created search, follow, and unfollow features to enhance user interaction and community building using React and Chakra UI.

Bonsai / Code Platoon Capstone · Docker · AWS EKS · Terraform · GitHub Actions · Django · React ·

CloudWatch

- Containerized full-stack application with Docker Compose; deployed to AWS EKS using Terraform IaC.
- Implemented CI/CD pipeline with GitHub Actions; automated backups with Lambda + EventBridge; monitored with CloudWatch.

ADDITIONAL

Languages: English (Fluent) · Portuguese (Native) · Spanish (Professional Working)
